

# DURA-TREAD™ SURFACE PROTECTION FILM

## NON-SLIP, HEAVY-DUTY PROTECTION BUILT FOR ACTIVE JOBSITES.

Dura-Tread and Dura-Tread FR are a diamond tread surface protection film engineered to deliver reliable grip and tough temporary protection in high-traffic environments. Backed by Viaflex's engineered film expertise, it helps protect surfaces from damage caused by typical day-to-day trade activity while offering secure footing for the crew on the job.

### Why Dura-Tread and Dura-Tread Fire-Retardant (FR) is the surface protection film to use

- **Slip-resistant diamond tread:** Helps protect crews and supports OSHA-minded jobsite safety.
- **Built for heavy traffic & protects what's underneath:** Withstands heavy loads and foot traffic without shifting or tearing while prevent surface damage from typical trade activity and wear.
- **Fire-Retardant performance:** For stringent construction and marine safety requirements.

Tell us your application and whether you need standard Dura-Tread or Dura-Tread FR and We will help you spec the right Dura-Tread surface protection film for the job.

### Uses for real-world project installs:

- **Multi-trade interior buildouts** to protect finished floors while keeping crews sure-footed in high-traffic corridors
- **Marine vessel maintenance and refit areas** to add grip and protect decks during active work
- **Restoration drying and cleanup zones** where wet conditions increase slip risk and surfaces still need protection
- **Temporary access pathways** through jobsite work zones to reduce slips and limit wear on underlying surfaces
